

## The stupid gardener

A gardener planted a row of 100 strawberry plants in his garden, setting them exactly 1 m apart. Each plant produced just one strawberry.

When picking time came, the stupid gardener placed a basket 1 m from the end of the row, and then proceeded to pick and carry each strawberry to the basket one by one.

Starting and ending at the basket, how far had the gardener walked when he finished picking all 100 strawberries?
